

eVision™ Launch

eVision™

The eVision™ is a 'clean sheet' design of Criticare's next generation patient monitoring platform incorporating 25 years of technical innovation. Great care has been taken to incorporate many new and innovative benefits for both patients and clinicians. eVision™ features include: Interactive high resolution touch-screen display, unique set-up and programming options for individual patients and lightweight, easily swappable modules.

eVision™ is the first new product designed by CSI that utilizes a 'green' energy saving and environmentally friendly concept. Design considerations include solar panel trickle charge, low power consumption and fully recyclable packaging.

Super Module

The standard Super Module is designed to store patient data and trends to provide continuous monitoring during patient transport.

8500H Poet® IQ

nCompass™ with Poet® IQ

The Poet® IQ is the benchmark of CSI's anesthetic gas analysis technology. In addition to the sleek new design and lighter weight, the new Poet® IQ features an access door for the O2 cell as well as the CO2 absorber. Performing routine maintenance no longer involves opening the unit.

When paired with the nCompass™ Series patient monitor, the Poet® IQ provides a unique combination of leading edge vital signs technology and anesthesia gas monitoring in a compact, modular system. The nCompass™ sits neatly on top of the Poet® IQ due to incorporated slots for the nCompass footprint.

State-of-the-art non-dispersive infrared (NDIR) technology identifies and measures five anesthetic agent gases: Halothane, Enflurane, Isoflurane, Desflurane, and Sevoflurane. In addition, the Poet® IQ automatically identifies inspired and expired O2, CO2 and N2O.

The system's reliable performance, ease of use, flexible design, and affordable cost make it the ideal monitoring solution for anesthesia applications in hospitals and surgical centers.

The CEO's Column

YK Gauba

2009 marks the Silver Jubilee of Criticare Systems and the dawn of a new era in Criticare's glorious past and promising future.

Despite the continued slowdown in the economy and various challenges, CSI has been successful in delivering the **New Generation Gas Bench** and **eVision™** – CSI's first ever modular patient monitoring system. I would like to congratulate the entire Criticare team for having accomplished this. I would also like to take this opportunity to thank all our business partners in the Asia Pacific and Middle East markets for having supported us over the years and making the eVision™ launch in Thailand a grand success. Also, our soft-launch of eVision™ at the American Society of Anesthesiologists in New Orleans was a tremendous success. I am also looking forward to our global launch of eVision™ in November at Medica, Düsseldorf.

The birth of our first Modular Patient Monitoring System, New Generation Gas Bench and our existing product range with our core innovative technologies will position CSI in a much stronger position in the global marketplace.

YK Gauba, CEO
Criticare Systems, Inc.

Showcase
eVision™ Previews at ASA

The eVision™ made a preview appearance at the 2009 American Society of Anesthesiologists (ASA) meeting in New Orleans.

eVision™ Launch
Asia Pacific & Middle East
Markets – October, 2009

The CSI team with their business partners at the eVision™ launch, Thailand

Showcase cont.

AAOMS - October 14-17, 2009

This year's AAOMS show in Toronto proved a phenomenal success with near record sales even in this lackluster economy. Congratulations to the sales team!

Medica - November 18-21, 2009

Medica kicks off in just over two weeks in Düsseldorf, Germany. Hall 9, Stand C26

Arab Health – January 25-28, 2010

Dubai, UAE

We encourage you to stop and explore the latest offerings from Criticare, especially the eVision™.

Quote of the Month

"Western society has accepted as unquestionable a technological imperative that is quite as arbitrary as the most primitive taboo: not merely the duty to foster invention and constantly to create technological novelties, but equally the duty to surrender to these novelties unconditionally, just because they are offered, without respect to their human consequences."

- Lewis Mumford
